PROFILE INFO

Detail-oriented Computer Science undergraduate (3.39 CGPA) specializing in cross-platform mobile application development using Flutter and Dart.

Proven ability to transform design concepts into responsive user interfaces.

Combines core software engineering principles with an independent background in documentary storytelling.

PROJECTS & EXPERIENCE

E-COMMERCE APPLICATION

- Built a full-featured ecommerce application with a product catalog, shopping cart, checkout process, and state management for a seamless user experience.

STUDENT DB MANAGER

- Complete CRUD application for managing student records with a local SQLite database, search functionality, and data export.

WHATSAPP UI CLONE

- Developed a feature-rich messaging app interface with a real-time chat feel and smooth animations built with Flutter.

DIGITAL CONTENT CREATOR | TIKTOK: @TAYYABCREATES

- Direct, script, and edit cinematic documentaries covering regional history across Punjab, demonstrating strong end-to-end project management and visual storytelling skills.
